   @ATDWHEELS

We carry the most popular brands your customers are looking for. Whether it's elegant or sporty, refined or rugged, ATD has a broad selection of wheels to match any car or style to their satisfaction.

Distribution Map

AN ALL-INCLUSIVE WHEEL SELECTION

Elegant, sporty, rugged or basic. We have every kind of wheel your customers will ever want, from the top brands in the business.

TIS Wheels was founded in 2005 in Los Angeles, the heart of custom car culture. TIS originally stood for "Twenty Inches Strong" in the early 2000's, back when the 20" wheel was pushing the boundaries of wheel fitments. TIS continues to innovate and has quickly become an industry leader with a renewed focus on off-road wheels built for the streets or for more unforgiving terrain.

#TEAMTIS

The founders of TIS are industry veterans responsible for well known properties such as DUB, The DUB Show Tour, and LFTDxLVLD. With over 300 events and hundreds of magazines produced, the TIS team are experts in design and marketing, with a unique understanding of what resonates with custom truck and Jeep builders across the nation.

EST. 2005

2021

In 2021 TIS is adding several exciting new wheel designs to the collection, including a deep concave version of the hot 544, called the 554, as well as the off-road racing inspired 555 and 556.

ULTRA MOTORSPORTS

THE LEGACY OF
ULTRA WHEEL

Jim Smith Founded Ultra Wheel Company in 1984, after he realized most aftermarket wheel companies were missing something vital...Exclusive styles with a healthy dose of attitude to deliver a look that is a perfect reflection of personal individuality. Smith's aggressive passion for truck racing coupled with our lifetime structural warranty is what has lead our company to becoming a top competitor in the wheel manufacturing and race industry as a whole.

Congratulations to six-time
Pro 4 World Champion
Kyle Leduc

ULTRA
MOTORSPORTS
Xtreme
RACE WHEELS

Founding of Nascar Truck Series

Later that year, Smith with the help of others, would go on to create the Nascar Craftsman Truck Series.

Nascar Presidents Award

In 1995, Smith was awarded for outstanding contributions to the advancement of Motorsports.

Nascar Truck Series Champions

In 2005 Ted Musgrave and Smith won the Championship in the Nascar Truck series they helped create.

35 Years Later

For over 3 decades, we have consistently maintained our high quality standards and have become famous from our dealers to our consumers alike for delivering some of the most durable and appealing wheels on the market.

1984

Ultra Wheel Founded 1984

Smith founded Ultra to deliver exclusive styles in a variety of styles for personal individuality.

1993

1994

BAJA 1000 Winner

In 1994 Smith was the first person to win the Baja 1000 in a Trophy Truck.

1995

2000

Baja 2000 Winner

In 1995, Smith was awarded for outstanding contributions to the advancement of Motorsports.

2005

2015

2019

WTC Hall of Fame

Smith was inducted into the SEMA Wheel & Tire Council Hall of Fame with a lifetime achievement award for his long-lasting impact on the wheel industry. He was honored for enhancing technological advancements, professionalism, dignity and stature of the wheel and tire market place.

ALL WHEELS PATENTED OR PATENT PENDING

DRIFZ is designed to out perform anything in its weight class. Our team continually seeks to deliver quality & innovative product by listening & observing the passion of our community. As a brand, we make sure that performance is at the forefront of our design & engineering process. As we tap into passion & performance, we believe it can continue to cultivate culture within the dirt/tuning community.

WE GOT YOU

KNURLED BEAD SEAT.

DRIFZ knurled bead seat improves the grip between the tire and rim reducing tire slippage. This achieves the highest performance during extreme acceleration and deceleration.

STRUCTURAL RIDGES.

Strengthened ribbed ridges have been designed into the barrel to benefit the structural integrity and durability of the wheel.

RACE POCKETING.

Strategic pocketing was implemented to minimize weight without compromising the strength, reliability and safety of the wheel.

Flow Formed wheels come from a process that allows wheel manufacturers to use less material and thus can create a lighter wheel. The process is similar to a cast wheel. Once the cast is made the unfinished wheel is placed on a machine where the wheel is heated and then spun. A spinning disc contacts the wheel and widens the barrel of the wheel forming the final shape and width of the wheel. This process of heat and pressure helps strengthen the aluminum in the barrel portion of the wheel.

ROUGH COUNTRY / 100% SATISFACTION GUARANTEED / FMVSS 126 COMPLIANT

/ WARRANTY GUARD / LIFETIME REPLACEMENT WARRANTY

ROUGH COUNTRY®

- / TOP QUALITY PRODUCTS
- / UNBEATABLE SERVICE
- / INCREDIBLE VALUE

If you purchase a Rough Country Suspension product and you are not completely satisfied with any aspect of the product you may return it within 90 days for a full refund of the purchase price

At Rough Country, our mission is to provide suspension systems and related accessories that enhance the performance and look of your vehicle. We stand behind the quality of all our products, which includes their performance as well as their compliance with NHSTA guidelines.

We are confident in the quality of our products, but we understand that sometimes new-model owners are hesitant to lift their vehicle due to the terms of their warranty. Rough Country's Warranty Guard has you covered - even when your manufacturer doesn't. This free protection supplements your manufacturer's warranty guaranteeing that if you are denied repair due to having a Warranty Guard protected product on your vehicle, then Rough Country will foot the bill for your repair! Please read the terms of our program to see eligibility and terms.

Rough Country Suspension Systems offers a Lifetime Replacement Warranty on most suspension products. All products are warranted to be free from defects in material and craftsmanship for the life of the vehicle if utilized in accordance with the manufacturer's instructions for installation and operation of said products. *We'll replace your defective item at no cost to you!

At Rough Country, Off-road action is our business and our hobby, so we are always focused on providing a wide range & selection.

Delivering high-quality and innovative solutions to the tire industry's sensory needs. All Schrader's aftermarket products are OE quality and designed for fit and function.

ATD VISUALIZER

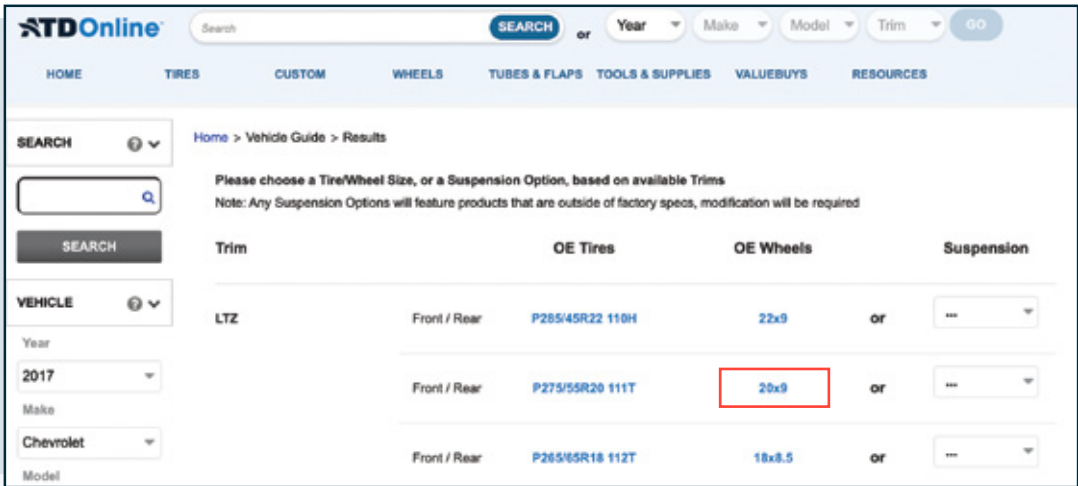

Getting Started

Select your Year, Make, Model and Trim at the top of the ATDOnline back-end.

Select Suspension / Wheel / Tire Options

Here you can select your Tire Size, Wheel Size or Suspension Setup. For this example we used the 20" wheel size.

Selecting Wheel Options

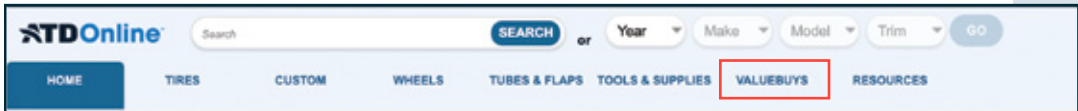

For this example we selected the Motiv 424MB Mutant for this Red 2017 Chevrolet Silverado 1500 LTZ Shortbed. As you can see, there are many other options that will fit this vehicle, as well as select tire and suspension options to the right under vehicle options.

ATD VALUE BUY

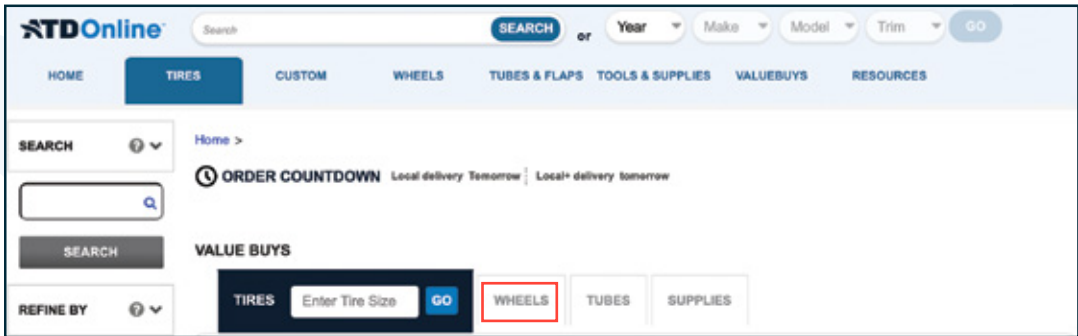

Locating The Value Buy Section

When visiting ATDOnline, locate the Value Buy link at the top navigation.

Value Buy Options

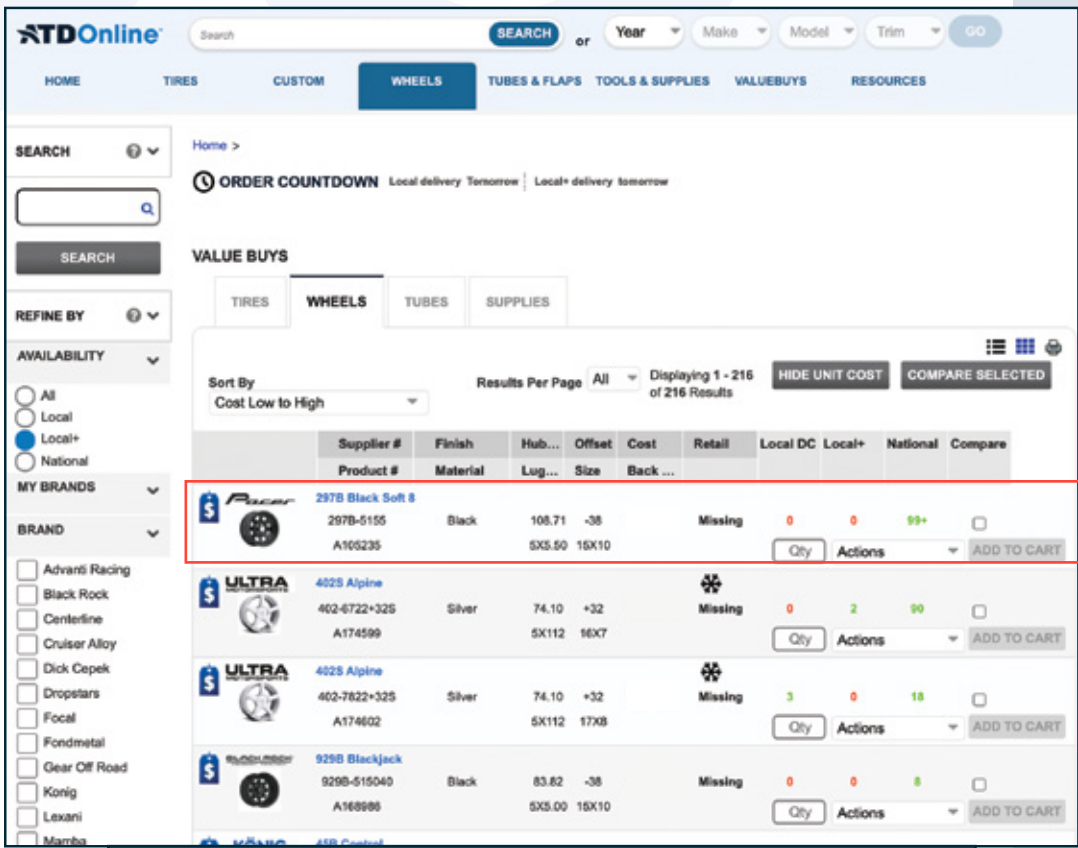

Once you enter the Value Buy section, you'll see there are a few options to choose from. For this example, we are going to go into the Value Buy Wheels selection.

Value Buy Options

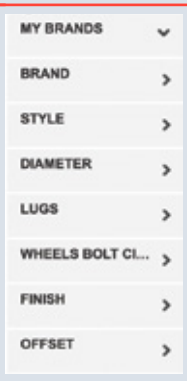

Once wheels are selected, you'll begin to see ALL the discounted wheels available to you. This is a huge opportunity to purchase inventory at a discounted rate only increasing your profits.

We make it extremely easy to find anything you're looking for using our extensive filter options on the left hand side of the results.

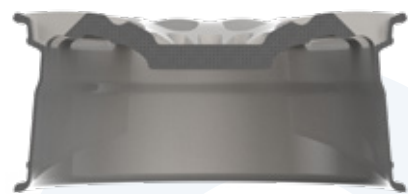

PRO TIP

Anywhere you see this icon on the ATDOnline website, that item is on a Value Buy Pricing Promotion!

WHEEL CONSTRUCTION

CASTING

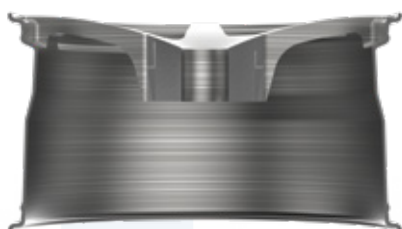

Casting aluminum wheels is the most common manufacturing process for alloy wheels on the market. Cast wheels are made by pouring molten aluminum (or drawn in with a vacuum) into a mold that forms the wheel shape. The aluminum cools and then it is machined, drilled, and trimmed into the final wheel.

FLOW FORMING

Flow Formed wheels come from a process that allows wheel manufacturing to use less material and thus can create a lighter wheel. The process is similar to a cast wheel. Once the cast is made the unfinished wheel is placed on a machine where the wheel is heated and then spun. A spinning disc contacts the wheel and widens the barrel of the wheel forming the final shape and width of the wheel. This process of heat and pressure helps strengthen the aluminum in the barrel portion of the wheel.

FORGED

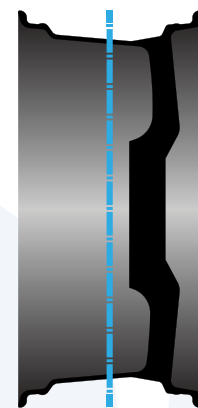

The forging process for aluminum wheels uses heat and pressure to form the part. The hot forging process begins with an aluminum slug that is heated until it becomes pliable. The slug is then placed into the forging press and it is either struck (mechanical press) or compressed (hydraulic press) into a formed die. This die is then machined to its final product form. A forged part is stronger, so the part can be made thinner, and therefore lighter.

OFFSET EXPLAINED

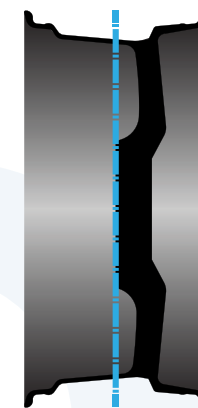

TYPES OF WHEEL OFFSET

--- WHEEL CENTERLINE

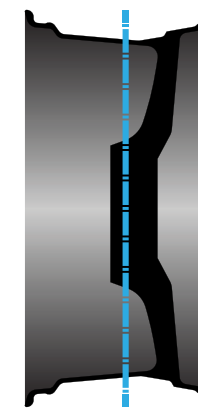

POSITIVE OFFSET

The mounting surface is to the outside of the wheel.

ZERO OFFSET

The mounting surface of the wheel is on the centerline.

NEGATIVE OFFSET

The mounting surface is tucked back closer to the inside edge.

OFFSET VISUAL EXAMPLES

POSITIVE OFFSET

Positive offset will result in a more OEM or fender flush look.

NEGATIVE OFFSET

Negative offset will result in a more extreme "poked" look.
